SANITARY HOSES

DOCKWEILER TRACEABILITY - DOCKWEILER QUALITY

The extensive range of rubber and silicone hoses distributed by Pure Transfer Ltd., UK has been integrated into the Dockweiler product range. Pure Transfer Ltd. is the newest member of the Dockweiler group of companies.

FDA RUBBER HOSES

Our FDA-approved rubber hoses are designed to transport a wide variety of fluids without imparting odour or taste. These premium, reinforced hoses perform high-quality sanitary suction and/or discharge.

Features	Applications	Approvals
Custom laylines available	Water transfer	3A Sanitary Standard 1800
Smooth inner-bore does not allow for entrapment	Cosmetics	FDA 21 CFR 177.2600
Available in bulk or fabricated assemblies	CIP pharmaceutical applications	USDA
Available in 8 different colours	Chemical transfer	

SILICONE HOSES

Our platinum-cured silicone, ultra-flexible hoses have been developed for high temperature conditions. Autoclavable and sterilized, our hoses fulfil demands for high purity, safety, pharmaceutical and bio compatibility.

Features	Applications	Approvals
Ultra flexible	Medical / surgical applications	3A Sanitary
Ultra pure medical grade	Fermentation	USP Class VI
Non toxic	Biotechnology	FDA 21 CFR 17.1550
Non pyrogenic	Pharmaceutical processing	
Lot and batch traceable	Cell cultures	
Available in bulk or fabricated assemblies	WFI transfer	
	Pump applications	

All assemblies show full traceability, enabling hoses to be identified in line and replaced with minimum disruption to production.
